**Hanumantha**

"It has been a great experience so far. I've had the swap point for about a year now, and it's lovely to see EVs come and go. I'm realising the profits, and it's given a boost to my monthly income as well!"

**Ravishankar**

I have had the swap station for 6 months now, and I see at least 50 electric vehicles come and go every day! It's been a problem-free experience so far, and the profits are also healthy. I'd recommend this to anyone looking to make a good investment for the future.
